ASTRO DIVISION

Long-Life Self-Lubricating Spherical Bearings Featuring NHBB's MK Liner System

Introducing the industry's first self-lubricating liner system to qualify to the new performance threshold of 100,000 cycles for spherical bearing life, established by industry standard AS81820 Type A.

NHBB's MK liner system utilizes PTFE to provide the long life and wear resistant surface required of Type A spherical bearings. Spherical bearings with the MK liner system offer the performance advantage of extended life at high loads in demanding aerospace applications such as flight controls, wing surface controls, actuators, landing gear, engine pylons, and engine mounts.

Increased Design Flexibility and Longer Lasting Performance

Self-lubricating spherical bearings with the MK liner system:

- Are interchangeable with existing products
- Are qualified to the same wear limits as non Type A bearings, but at four times the bearing life
- Uniquely meet both the new AS81820 Type A standard and the non Type A standard.

Engineering Support

For NHBB, the MK liner represents our ability to meet customers' exacting specifications and anticipate their needs. While we are well positioned to provide the industry's first series of long-life self-lubricating spherical bearings, we are dedicated to supporting our customers through the design and production of custom bearings, next-up assemblies, and machined parts. Please contact Astro's sales or engineering teams for assistance with your specific requirements.

Interactive Site Visits

Need us to take a closer look? NHBB's Product Engineering team regularly travels to our customers' facilities to provide direct support in developing engineered solutions for any challenge. For more information, please contact NHBB's Product Engineering team at the Astro Division. 603.524.0004. email: info@nhbb.com.

AS81820 TYPE A Dynamic Oscillation Wear Test Results
NHBB's MS14103A Bearings—MKW5V, MKW8V, and MKW12V

BEARING P/N	TEST LOAD (LBS.)
MKW5V	6,050
MKW8V	14,950
MKW12V	26,200

Test Parameters:
 1. Conditions: Room temperature, dry
 2. Oscillation angle: +/- 25°
 3. Frequency: 20-30 cycles per minute

NHBB also holds qualification to the AS81820 Type A lined bore series - M81820/1A, M81820/2A, and M81820/4A.

*For chamfered version, delete 'V' from part number.

◆ MKB5VA is a V-groove type bearing only.

Notes:

- Bearing sizes -3 through -16 are approved for procurement to AS81820 Type A and Aerospace Standards AS14101 through AS14104.
- Bearing sizes -18 through -24 are not included in current Aerospace Standards, but are offered as NHBB catalog items only.
- Operating temperature range per AS81820 Type A is -65 to +325 °F. Broader temperature capabilities are achievable.
- All dimensions are in inches unless otherwise specified.

Astro Division, Laconia, NH

Astro designs and manufactures highly specialized custom bearings, next-up assemblies, and machined parts requiring significant engineering expertise and specialty materials. Our stringent process controls and advanced planning system enable us to satisfy unique production requirements and provide improved delivery scheduling as part of our continuous improvement culture and commitment to customer satisfaction.

PRODUCTS

- Rod ends
- Sphericals
- Link assemblies
- Bushings
- Loader slot bearings
- Custom-lined parts
- Bearings up to 22" O.D.
- Next-up assemblies & machined parts
