Notes:

- Metric series angular contact ball bearings are typically manufactured from 52100 chrome steel to ABEC 3, 5 and 7 tolerances per ABMA Standard 20.
- Standard contact angles are 15° and 25°. Other options are available.
- Part numbers listed are with nonseparable, outer ring relieved configuration. Other design options are available.
- Fillet Radius (r) is the maximum shaft or housing fillet radius that bearing corners will clear.
